

PRODUCT FEATURES

- Model HHC-1 portable hand held controller is temporarily connected to the end of the damper actuator cable to adjust the remote damper / balance the air flow to design specifications.
- No hard wiring or building power is required for Zipset Remote dampers as the HHC-1 Hand Held Controller contains the low voltage power source (replaceable 9vdc battery). Includes one battery installed in the controller.
- Multi-color LED indicator light communicates damper adjustment, battery charge status, motor stall fault condition, or if there is a wiring short.
- Red Rocker Switch turns the damper CW or CCW to precisely change the damper position to obtain desired air flow.
- 36" Integral cable to easily connect the controller to the actuator cable.
- Protective case included.

REPLACEABLE BATTERY 9VDC

PROTECTIVE CARRYING CASE
